SUGGESTIONS ABOUT ORDERING AND TERMS OF SALE

Order Early. Please favor us with your order promptly upon receipt of this catalog. This will facilitate the task of filling your order promptly. Write plainly and give explicit directions as to address, and mode of shipment. Shipments will be forwarded exactly as directed, but when without instructions, we will use our own judgment and forward by the shortest and safest route.

Planting Season. From November to March is the best time for planting all trees grown in the open field.

Substitution. It is our desire to furnish stock exactly as ordered. No substitutions are made without permission from customer.

Delivery. The point of delivery of all goods is upon cars at Thomasville, Ga.

Terms. Cash with order if for immediate shipment. Orders for plants to be held for some weeks after the shipping season opens, should also be accompanied by full payment. We do not care to ship stock C. O. D.

Location. Our nurseries are located one mile from the city limits of Thomasville, Ga., on the Lone Star Trail. Visitors are always welcome. We take pleasure in showing our stock to persons interested.

Guarantee and Claims. All goods are guaranteed true to name, up to grade and in good condition when shipped. Any plants proving untrue to name will be replaced. Our stock is of the highest grade, thrifty and well grown, insuring its success if properly cared for after transplanting. As we have no control over its usage after it leaves our hands, properly packed and in good condition, we can give no guarantee on the life of stock. However, any just complaint will receive our utmost consideration. Stock delivered as per order and in good condition, is not returnable.

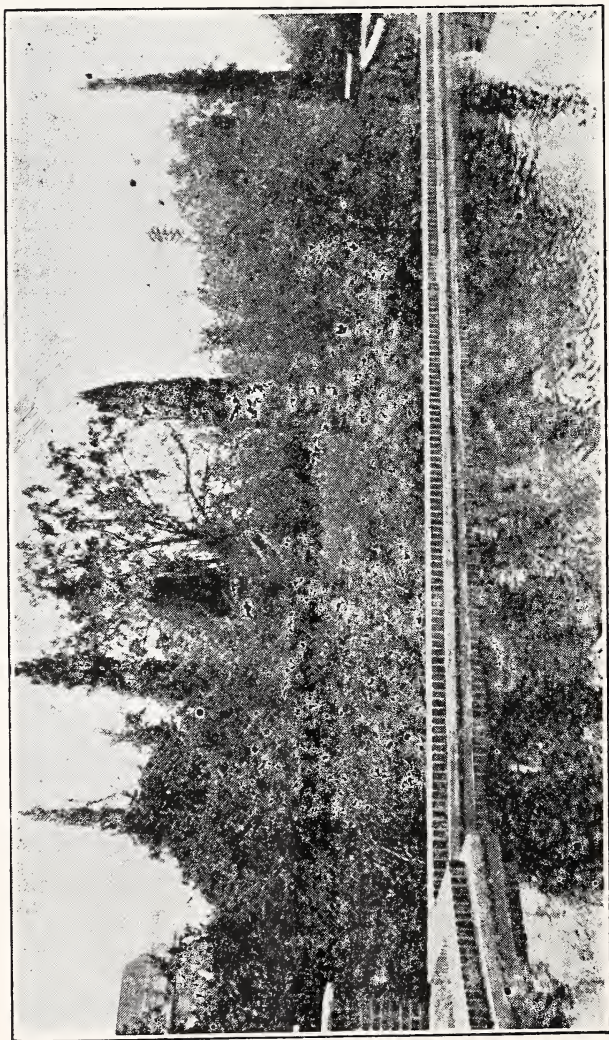

Goods in Transit. All goods are at purchaser's risk, after they are delivered to forwarding companies, and we receive their receipt for the shipment in good condition. Claims for damage while in transit must be made to the delivery company when goods are received.

REASONS WHY YOU SHOULD USE PLANTS GROWN BY US

1. They are the very best that can be grown.
2. Our prices are reasonable.
3. They increase the value of your property.
4. They add a restful home atmosphere to your grounds.
5. They are adapted to southern conditions.
6. We employ experienced men to select plants to suit your needs.

LANDSCAPE DEPARTMENT

We maintain a landscape department. When you desire to beautify your grounds it is well to have our advice as to what and where to plant. Send us a photograph and an original drawing showing correct measurements of lot, location of buildings walks, drives, and trees, and our landscape department will help you solve your problem.

For Good Landscape Effects Consult Our Landscape Department

BROAD-LEAVED EVERGREENS

People now appreciate the effect attained by proper selection and planting of broad-leaved evergreens.

People traveling through Europe often returned intoxicated

with the wonderful effects attained with these on many of the old English estates. We are fortunate indeed to be able to grow such a large collection of broad-leaved evergreens in this section of the south. With a judicious selection of varieties, with a proper arrangement of evergreen trees and shrubs, gives to the winter aspect of our home grounds a warm and cheerful effect.

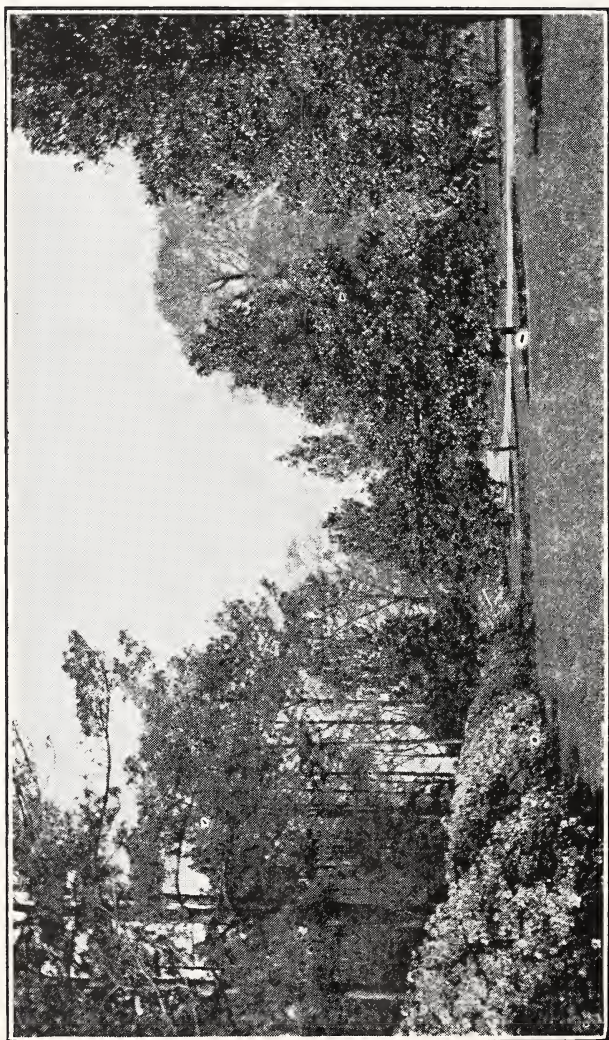

Block of *Abelia Grandiflora* Growing in Our Nursery

In transplanting evergreens the soil should be properly prepared and holes of ample size dug and fertilized. In all cases the fertilizer must be thoroughly incorporated with the soil. If the roots come in contact with green manure they are very apt to die, and in most cases should the ball of earth fall away

from the roots, the plants should be severely pruned or defoliated.

Nearly all plants taken from the open ground are lifted with a ball of earth to insure safe transplanting. When transplanting it is not necessary to remove the burlap. Place the plant to the right depth in a properly prepared hole, cut the string so

A Very Effective Planting of Azaleas and Magnolias Growing in Thomas County

that the burlap may be released from the ball of earth, half fill with soil, and then pour in water freely. Let this settle, afterwards put in more soil and firm well about the roots, then fill up the hole.

Abelia Grandiflora. One of our most beautiful, popular and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark glossy leaves, which

in winter assume a metallic sheen. From early May until frost, this plant produces quantities of tubular shaped white flowers about one inch long, which are borne in clusters.

8" to 10" plants 25c each, \$2.50 per doz., \$20.00 per 100.

12" to 18" plants 30c each, \$3.00 per doz., \$25.00 per 100.

18" to 24" plants 40c each, \$4.00 per doz., \$35.00 per 100.

24" to 36" plants 60c each, \$7.00 per doz., \$50.00 per 100.

Aucuba Japonica. A most desirable plant for dry and shady locations.

8" to 12" plants 50c each, \$5.00 per doz.

12" to 18" plants 75c each, \$7.50 per doz.

Azalea Indica. The azaleas are among our best evergreens for landscape effect. Grouping or single specimens, shady or open places, the best wintering flowering shrub we have in the south.

6" to 12" plants 50c each, 12" to 18" \$1.00 each, 18" to 24" \$2.00 each.

Boxwood. *Buxus Sempervirens.* Slow growing, old fashioned plant with incomparable depth and richness, of billowy texture and color. Breathes spirit of colonial gardens. Bush shape, nearly as broad as high. \$20.00, \$25.00 and \$30.00 per 100.

1—**Camellia Japonica.** Double Red and Double Pink. Small plants, 12" to 15", \$1.00 each.

2—**Cinnamomum Camphora.** Rapid growing and a very effective evergreen. The best plants we have for quick effect. Plants 25c, 50c and \$1.00 each.

3—**Cleyera Japonica.** A shrub of medium height with very glossy foliage. Plants 75c and \$1.00 each.

Crataegus Lalandii. A very effective and desirable shrub. In early spring the plant is covered with a profusion of white flowers, which are followed by bright orange berries, which are retained until well into winter. Plants \$2.00 and \$3.00 each.

Elaeagnus Pungens. Leaves a dark green above, silvery beneath. Creamy white fragrant flowers produced in January. Plants 75c and \$1.00 each.

Eriobotrya Japonica. Large flowering shrub. Attains a height of 20 ft. Flowers in fall. Very fragrant, followed by bright yellow plums. Plants 50c and \$1.00 each.

Euonymus. Leaves dark shiny green. Flowers during July and August, followed by a profusion of scarlet berries. Very effective. Plants 12" to 18" 75c each, 18" to 24" \$1.00 each.

Gardenia. (Cape Jasmine). A very popular evergreen. Small plants 25c and 50c each.

Ilex Opaca. (American Holly) Grafted. Plants 2' to 3' \$2.00 each.

Illicium Anisatum. (East India Tree). A handsome evergreen with light green leaves, which when bruised emit an anise fragrance. Plants 12 to 18" 75c each, 18 to 24" \$1.25 each.

Ligustrum Aureum Marginatum. Golden Japanese Privet. Plants 2 to 3' \$2.00 each.

Ligustrum Excelsum Superbum. Variegated Japanese Privet. Plants 2 to 3' \$2.00 each.

Ligustrum Iwata. A very desirable evergreen. Glossy leaves

with light green center.

12 to 15" plants, 50c each, \$5.00 per doz., \$40.00 per 100.

15 to 18" plants 75c each, \$7.50 per doz., \$65.00 per 100.

18 to 24" plants \$1.00 each, \$10.00 per doz., \$80.00 per 100.

24 to 36" plants \$1.50 each, \$15.00 per doz., \$100.00 per 100.

Ligustrum Lucidum. A beautiful form of Japanese Privet. Leaves large, thick, ovate, lanceolate, of dark shiny green. Plants same price as above.

Ligustrum Nepalense. Nepal Privet. Resembles the Japanese Privet, but of more compact growth. A very desirable variety in every respect. Same prices as *Ligustrum Iwata*.

Lonicera Fragrantissima. Japan Honeysuckle. Plants 2 to 3" 35c each.

Mahonia Japonica. A beautiful hardy shrub with prickly leaves. Produces large clusters of small yellow flowers in January. Desirable for undergrowth. Plants 12" to 15" \$1.00 each.

Michelia Fuscata. Banana Shrub. Plants 18 to 24" \$1.00 each.

Nandina Domestica. A beautiful upright growing shrub with numerous reed-like stems. In spring, white flowers are produced in large panicles, followed by masses of small red berries, which are retained all winter. Large plants \$2.00 each.

Olea Fragrans. Tea Olive. Small white flowers produced in clusters, which emit a pleasing fragrance. Very desirable. Small plants \$1.00 up to \$3.00 each.

Cleander. A most desirable shrub in the warm regions of the south, commencing to bloom in April, continuing throughout the summer. Small plants 50c and \$1.00 each.

Ophiopogons. A low growing perennial, native of Japan. In the south it is in a class by itself for bordering shrubs, palms, flower borders, or for edging walks and drives. In winter it has a beautiful dark green, grass-like foliage, throwing up numerous flower spikes in early summer, when it gives a stunning effect. It thrives beautifully under almost any condition, in a very dense shade or the hottest sunshine. Well worth a trial on the East Coast. Plants \$4.00 per 100.

Osmanthus Americana. Devil-wood. A tall evergreen shrub with whitish bark. Fragrant. A lovely shrub. Plants \$1.00 and \$1.50 each.

Photinia Serrulata. A large growing evergreen shrub, the foliage of which becomes very attractive in winter. Plants \$1.00 and \$2.00 each.

Pittosporum Tobira. Probably the most satisfactory evergreen shrub we have. Very highly recommended for East Coast of Florida. Plants \$1.00 and \$2.00 each.

Pittosporum Tobira Variegata. Similar to *Pittosporum Tobira*, but with leaves beautifully margined white. Same prices as above.

Prunus Cerasus Caroliniana. Small symmetrical growing tree, attaining a height of 20 to 40 feet, bearing a profusion of cream white flowers during March. Very desirable. Plants \$1.00, \$2.00 and \$3.00 each.

Viburnum Odoratissimum Nana. A valuable dwarf evergreen with broad leaves of lustrous dark green. Plants \$1.00 and \$1.50 each.

Viburnum Odoratissimum. Very desirable evergreen. Same prices as above.

Viburnum Tinus. Among the best of our flowering broad-leaved evergreens, of rapid growth. Attains a height of 10 feet. The white and pink flowers are produced in the greatest profusion in early February and last for a long time. The buds before opening are of a bright red. Plants \$1.00 and \$2.00 each.

DECIDUOUS TREES AND SHRUBS

Althaea. (Rose of Sharon.) A free-flowering shrub, producing single and double flowers in shades of red, pink, purple and white. Plants 2 to 3' 50c each.

Buddleia Variabilis Magnifica. A beautiful shrub, commencing to bloom in June and lasts until frost. Plants from 4" pots, 25c each.

Calycanthus Præcox. Very fragrant flowers. Flowers during the months of December and January. A most desirable large-growing shrub. Plants 2 to 3' 50c each.

Cercis Canadensis, or Judas Tree. Profuse rich purple flowers in early spring. Very effective for woods planting or grouping with evergreens. Prices 3 to 4' plants, 75c each; 4 to 6' plants, \$1.00 each.

Cydonia Japonica. Japan Quince or Fire Bush. Plants 50c and 75c each.

Exochorda Grandiflora. Tall-growing shrub with large white flowers, produced in great profusion in early spring. Plants 50c and 75c each.

Forsythia. Golden Bell. Flowers golden yellow. Most effective when grouped in large masses. Plants 35c and 50c each.

Halesia Tetraptera. Snowdrop Tree. Most desirable large-growing shrub. Flowers in early spring. When in bloom the bush is literally covered with small white flowers which resemble the snowdrop. Small plants \$1.00 each.

Hydrangea Hortensis. Very desirable early summer flowering shrub. Nice bushy plants, 50c each.

Lagerstroemia. Crepe Myrtle. Large plants 75c and \$1.00 each.

Lonicera Fragrantissima. Tall, open grower. Very small white fragrant flowers in early spring. Retains its foliage until late in fall. Plants 35c and 50c each.

Magnolia Purpurea. A most desirable large-growing shrub, flowering in early spring before the leaves appear. Plants, \$1.00, \$2.00 and \$3.00 each.

Persica. Double flowering peach. One of the most effective small growing trees in early spring. Plants 75c and \$1.00 each.

Prunus Japonica. Double Flowering Almonds. Pink and white. Plants 75c each.

Pyrus Floribunda. Flowering Crabapple. Very ornamental. Small trees, clothed with fragrant flowers in early spring. Plants \$1.00 each.

Salisburea Adiantifolia. Maidenhair Tree. Very effective as a tall avenue tree. The foliage resembles maidenhair fern and

HYDRANGEA

turns a brilliant yellow in fall. Resembles Lombardy Poplar in early stages of growth. Plants \$1.00 each.

Spirea Reevesiana. Double and single. These flower in early spring. Large clusters of flowers cover the entire bush. Plants 25c and 50c each.

Spirea Van Houtte. A graceful shrub. Flowers a little later than the above variety. Plants 25c and 50c each.

Spirea Thunbergii. A most desirable plant for low hedges or massing. Plant's 30c and 50c each.

Weigelia. White and pink. Plants 25c and 50c each.

CONIFEROUS EVERGREENS

These evergreens are most desirable for grouping, also as single lawn specimens.

Biota Aurea Nana. Compact, dwarf, golden Arbor Vitae. Very effective for formal plantings. Plants 18 to 24" \$1.50 and \$2.00 each.

Biota Orientalis Compacta. Dwarf green and compact growing evergreen. Plants 2 to 3' \$2.00 and \$3.00 each.

Biota Rosedale. A most attractive and popular variety, of compact habit of growth. Feathery foliage of a dark bluish-green color. Plants 12 to 15" \$1.00 each; 2 to 3' \$3.00 each.

Biota Aurea Conspicua. A compact, erect, symmetrical habit. Foliage intense gold. 1-year plants 50c each.

Cupressus Sempervirens Pyramiladis. (Italian Cypress.) A most desirable conifer where a formal effect is desired. It is of

compact and shaft like habit. Small plants \$1.00 each. Inquire for prices on larger stock.

Cephalotaxus. Small plants \$1.50 each.

Juniperus Virginiana. Red Cedar. 2 to 3' \$2.50 each.

Juniperus Virginiana Glauca. Silver Cedar. Most desirable evergreen. The young growths are of almost silvery whiteness, which changes to pale glaucous green in winter. Plants 24" \$3.00 each.

Retinospora Plumosa. Green plumed cypress. Of graceful habit. Useful for almost any kind of work. Growth of a tall pyramidal shape.

Retinospora Plumosa Aurea. Golden plumed cypress. One of the best, hardiest and most desirable. The rich golden growth of spring holds well through summer

Retinospora Squarrosa Veitchii. Rapid grower. Heath-like foliage, bluish green. Handsome and distinct.

Prices on all Retinosporas: Plants 12 to 15" \$1.00 each; 2 to 3' \$3.00 each.

ROSES

Our roses are budded, or grafted, on vigorous stocks adapted to the long summers of the south. The superiority of budded, or grafted, roses has long been recognized throughout the Southern States. Every home-owner should have a few nice roses growing in his garden. Why not order today and avoid the risk of not securing the varieties you wish?

Prices 50c each, \$5.00 per dozen, \$40.00 per 100, except where noted.

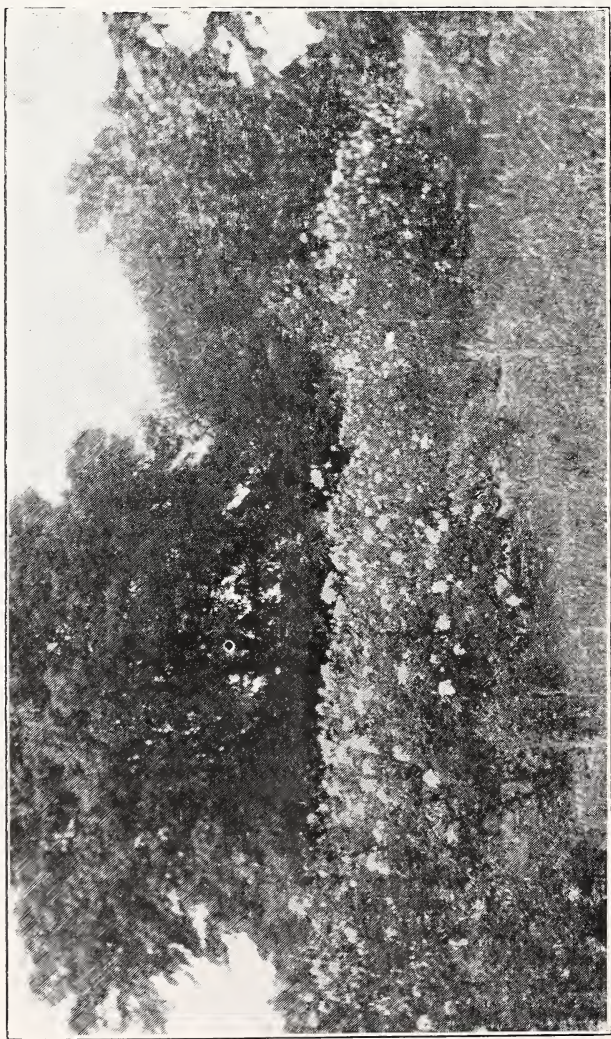

TEA ROSES

1—**Alex. Hill Gray.** Yellow Maman Cochet. Flowers clear, deep yellow, large, and of perfect formation. Strong upright grower.

3—**Duchess De Brabant.** Shell pink shaded carmine. A free-flowering and vigorous rose.

Duchess De Brabant. White. A white form of the above, with all its qualities.

E. E. Marlitt. Vigorous grower. Flowers bright crimson. Fragrant.

Plant Our Roses to Obtain This Beautiful Effect.

Viburnum Odoratissimum. Very desirable evergreen. Same prices as above.

Viburnum Tinus. Among the best of our flowering broad-leaved evergreens, of rapid growth. Attains a height of 10 feet. The white and pink flowers are produced in the greatest profusion in early February and last for a long time. The buds before opening are of a bright red. Plants \$1.00 and \$2.00 each.

DECIDUOUS TREES AND SHRUBS

Althaea. (Rose of Sharon.) A free-flowering shrub, producing single and double flowers in shades of red, pink, purple and white. Plants 2 to 3' 50c each.

TEA ROSES

1—**Alex. Hill Gray.** Yellow Maman Cochet. Flowers clear, deep yellow, large, and of perfect formation. Strong upright grower.

3—**Duchess De Brabant.** Shell pink shaded carmine. A free-flowering and vigorous rose.

Duchess De Brabant. White. A white form of the above, with all its qualities.

E. E. Marlitt. Vigorous grower. Flowers bright crimson. Fragrant.

Plant Our Roses to Obtain This Beautiful Effect.

Freiherr Von Marchall. Carmine red. Strong grower and free bloomer. Often called the double Papa Gontier.

Golden Oriole. Deep yellow rose. Strong grower and free bloomer. \$1.00 each.

Killarney. Pink. Semi-double; glowing pink. Very fine. One of the best.

Killarney. White. All the qualities of Pink Killarney. A very satisfactory rose.

Lady Hillington. Long pointed buds; deep golden yellow.

Madam Lambard. Deep rose. Variable in color at different seasons of the year. Strong grower and one of the most satisfactory roses to grow.

Maman Cochet. Pink. Light shaded with bright rose. Very popular.

Manan Cochet. White. Beautifully long pointed buds. Full flower when open. A splendid rose.

Madam Melanie Soupert. Salmon yellow rose with shadings of pink. A very free bloomer. Heavy flowers and vigorous plant.

Marie Van Houtte. Canary yellow outer petals, tipped with bright rose. Strong grower and splendid for the south.

Minnie Francis. Deep pink. Strong grower and free bloomer. A good rose.

Mrs. B. R. Cant. Deep rose to light red. Strong grower.

Papa Gontier. Rosy crimson. Fine when in bud. Most exquisite color in fall and spring. Slow to grow after transplanting.

Safrano. A good yellow rose. Very choice in bud. During mild winters flowers may be cut from this in January.

Sunburst. The great favorite yellow rose. Requires good care in this section for best results.

Snowflake. A favorite creamy white. Vigorous grower, of spreading habit.

Souv. Pres. Carnot. Light pink shading deeper to center. A lovely rose.

William R. Smith. Magnificent grower, producing full, well-formed flowers of soft pink and cream tints. A lovely rose.

2—Bon Silene. Pink. Free bloomer, strong grower. A fine rose for mass planting.

HYBRID TEA ROSES

Betty. Coppery rose, shaded golden yellow. Long pointed buds.

Countess of Gosford. Exquisite salmon pink. Strong grower and free bloomer. One of the best of all roses.

Columbia. Pink. Very attractive rose, growing on long, stiff stems. A favorite for greenhouse growing.

Etoile de France. Beautiful shade of red. Velvety crimson. Probably the best of this color.

General Superior Janseen. Deep carmine. Strong grower and free bloomer. Very satisfactory rose.

Jonkheer J. L. Mock. Most attractive rose. Carmine outside of petals, lovely shade of pink on inside. Large rose on stiff stems.

Kaiserine Aug. Victoria. Creamy white. Very double buds, large and pointed. Best white hybrid tea rose.

Lady Alice Stanley. Flesh pink. Profuse bloomer. A splendid rose.

La Tosca. Pink. Strong grower. Very fragrant and a free bloomer.

Mrs. Charles Bell. Shell pink radiance. One of the strongest growers of the Hybrid Tea class. It is impossible to overrate the value of this rose for southern planting. It is equally as good grower as its parent, Radiance.

Mrs. Wakefield Christie-Miller. Soft pearly blush, shaded salmon.

Radiance. Probably the best pink Hybrid Tea Rose grown. Strong grower and free bloomer.

Radiance. Red. A sport of the Radiance, with the same freedom of bloom and vigorous growth as its parent, and Mrs. Charles Bell, the favorite Hybrid Tea rose.

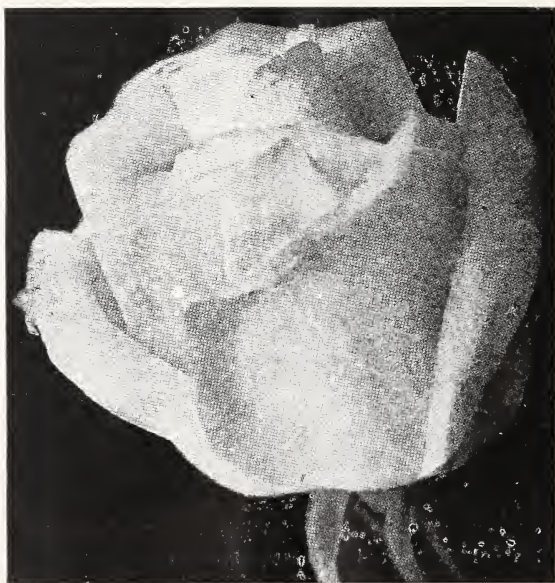

Yellow Kaiserine. Beautiful golden yellow. Free bloomer.

HYBRID PERPETUAL ROSES

Baroness Rothschild. Flesh pink. Large and full. A lovely rose.

George Ahrends. Bright pink. A very satisfactory rose.

Paul Neyron. The largest rose known. Deep rosy pink, full flower. Very fragrant.

WHITE AMERICAN BEAUTY

White American Beauty. Almost an ever-blooming rose in the south. The flowers are fine and full. Generally pure white. A strong grower.

POLYANTHA ROSES

Catherine Zeimet. White hyacinth scented. Very floriferous and double.

Erna Teschendorff. Bright red. Free flowering. Best of its class.

Mrs. W. H. Cutbush. Shell pink. Very dwarf.

CLIMBING ROSES

Beauty of Glazenwood. Semi-double, amber color, heavily shaded pink toward outer edge of petals. Strong grower. Lovely combination of colors.

Climbing Killarney. A climbing form of the well-known pink Killarney.

Cherokee. A vigorous climber, with single white flowers, which appear in early spring.

Cherokee. Pink. A pink form of the white Cherokee.

Devoniensis. White tinged with delicate pink. Very large flowers. Strong climber.

La Marque. Very free blooming white rose, with a tint of pale yellow. Dense foliage. Very desirable rose.

Marchall Niel. Well-known golden yellow climber. A lovely rose.

Reve D'Or. Flowers very much like Safrano, the favorite Tea rose. It holds its foliage well and is one of the best climbing roses.

Souv. de la Malmaison. Large flowers, very full. Flesh colored. A great favorite.

Pillar of Gold. Rosy pink; base of petals yellow; variable in color, representing a gorgeous sunset. A strong grower; most exquisite and satisfactory rose.

BEDDING PLANTS

1—**Aspidistra.** Lurida. A most suitable plant for dark halls and rooms, thriving with little light or attention. It is especially hardy over the lower south, and can be used to good advantage for low foundation work, especially in dry and shady locations. Plants 50c each.

2—**Daisies.** English. White, pink and red. Most valuable bedding plant for early spring effect. Plants 50c per doz.; \$3.00 per 100.

3—**Lantanas.** Shrubby plants with bright-colored flowers. Useful for bedding out for quick floral effect. Shades of pink, white, orange and yellow. Plants 20c each, \$2.00 per doz.

4—**Pansies.** We make every effort to carry in stock the best line of Pansies possible. This year they have been grown especially for us by the Pitzonkas Pansy Farm, of Bristol, Pa. Prices 50c per doz.; \$3.00 per 100.

5—**Verbenas.** White, red, blue and pink. Very effective in early spring, the plants being literally covered with flowers. Rooted cuttings 50c per doz.; \$3.00 per 100.

6—**Vincas.** A particularly valuable border plant for shady locations. Plants \$8.00 per 100.

7—**Violets.** Russian. Too common to require description.

GRAPES

The prices quoted are for 2-year No. 1 stock.

Agawan—Red.

Concord—Black.

Delaware—Red.

Moore's Early Black.

Niagara—White.

Plants 50c each.

THE MORRILL—The Wonderful New Grape

(First called the Morrill Seedling)

This grape was found by Mr. C. W. Morrill in Arkansas. In a limited way it has been tested in this section for several years, and with splendid results. Mr. Morrill reports that he has never sprayed the original vine, and that it has continued to bear good

crops for eighteen years, and that it is practically free from rot and mildew. It is a vigorous, healthy grower of fine flavor, ripening in South Georgia in early July.

The following letters from well-known persons are self-explanatory:

"GEORGIA EXPERIMENT STATION,
Office of Director,
Experiment, Ga.

April 14, 1922.

Mr. C. W. Morrill, Macon, Ga.

Dear Mr. Morrill: We have your letter of recent date. We have fruited the Morrill seedling grape at this Experiment Station satisfactorily for two seasons and find them highly resistant to black rot and other fungus diseases. The Morrill seedling is an attractive grape of good quality, and we would like to see more of it planted in this State.

Yours very truly,

(Signed) H. P. STUCKEY,
Director."

"BAYNE-MARTIN DRUG CO.

Macon, Ga., April 21, 1922.

Mr. C. W. Morrill, Macon, Ga.

Dear Mr. Morrill: Having bought two of your Morrill seedling grape vines two years ago, and having had such wonderful success with them, I want to offer you this testimonial.

You were out of the city last year about the time they ripened; and I did want you to see them, for out of four other varieties I have, the Morrill seedling was the most prolific and simply covered the whole arbor. There were so many of them that I invited the neighbors to help themselves. I consider the Morrill seedling the very best grape for this section of our country, and certainly there is no sweeter or more prolific grape anywhere; and so easy to cultivate.

I wish you continued success with it.

(Signed) S. E. BAYNE."

FRUIT TREES

PEACHES

Peaches. No garden for home orchard is complete without a succession of peaches. We offer the varieties best adapted to this section.

Belle of Georgia. Large, skin white, red cheek, of excellent flavor.

Carman. Fruit large, yellow, with deep blush. Juicy and fine flavor.

Elberta. Very large yellow fruit, with red cheek. Flavor excellent.

Greensboro. Extensively planted in the central south. Good size, very juicy. Quality fine.

Mayflower. The earliest variety grown. On this account, high color and excellent quality are strong points in its favor.

Prices—3 to 4' plants, 50c each, \$4.50 per 10; 4 to 6' plants, 65c each, \$6.00 per 10.

PEARS

As a rule, pears are most successfully grown in a very heavy clay, or clayey loam, that has been well fertilized. If grown in sandy soil, coarse manure or litter should be worked into the soil. Mulching is of great benefit, and the orchard should be kept cultivated at all times.

We offer list of three varieties which have been thoroughly tested and have proven valuable throughout the largest section of the south.

Pineapple Pear, Keifer Pear and Le Conte. Prices 65c each, \$5.00 per 10.

PERSIMMONS

Japanese Persimmons are thoroughly at home throughout the south. It is a vigorous grower and prolific bearer. The persimmon will succeed with very little care, but to attain best results it should receive proper fertilization and cultivation.

We are able to supply the following varieties: Hiyakume, Tamopan and Triumph. Prices 65c each, \$5.00 per 10.

FIGS

This fruit adapts itself to a wide range of soils and climate. The trees should be planted 15 feet apart. We offer only the Celeste Fig, which is the most desirable for canning and preserving. Prices 50c and 65c each.

CITRUS

Satsuma Orange. We keep only stock budded on the Citrus Trifoliata. This is the hardiest species of citrus known in this country. Varieties budded on this stock are made hardier because of its dormant and hardy character, and the fruit is of exceedingly fine quality. It is adapted to almost any kind of soil. Small plants \$1.00 and \$1.25 each.

Grapefruit. Duncan. Probably the best of all grapefruit grown for this section of the country. 2 to 3' plants \$1.00 each, cut back, with bare roots. Extra price for heavy plants, baled and burlapped.

Marsh Seedless. Its most marked characteristic is its practically seedless fruit.

Kumquats. The smallest of all citrus fruit in general cultivation. The plants grow generally 10 to 12' in height, with a spread of branches usually about equal to its height. The bright dark-green foliage with the deep golden-yellow fruits make a very pleasing combination of color. As an ornamental shrub it

is most desirable. Plants, 1-year buds, \$1.00 each; 2-year buds, stock plants, \$1.50 each.

Marumi. Fruit round, about 1 inch in diameter. This variety forms a well-rounded, symmetrical head.

Nagami. Fruit oblong, about 1½ to 2" long; golden yellow and of fine flavor. More upright and open grower than Marumi.

Neiwa. Fruit round, slightly larger than Marumi. Of recent introduction in this country.

PECANS

Pecans are rapidly becoming one of the most important orchard trees of the south. The merits of this valuable nut are being recognized as never before. The following distinctive features characterize the stock we offer.

Stocks are grown from selected nuts.

All stock which lack the vitality to produce rapid growth are discarded. A tree with an older root than four years is never sent out. If a tree has not sufficient vigor by that time it is dug up and burned.

Delmas. Large nut. Early and prolific bearer.

Frotscher. A large thin-shelled nut, widely planted.

Moneymaker. Most desirable, early bearer. Prolific and in every way promising.

Schley. Probably head of the list for flavor. It is a large thin-shelled nut, well filled with meat.

Stuart. An old favorite. A safe variety to plant. Succeeds over a wide range of territory.

Plants \$8.00 per 100.

Success. A nut of fine flavor. It has been widely disseminated during the last few years.

Plants 2 to 3' 80c each; 3 to 4' 90c each; 4 to 5' \$1.00 each; 5 to 6' \$1.20 each; 6 to 8' \$1.40 each.

Special prices on large quantities.

Thomasville, Ga.

Gentlemen: Roses as per enclosed bill arrived safely.

They seem to be in excellent condition and I feel certain that I will be pleased with them.

Yours truly,

G. M. R., Florida.

Lone Star Gardens,

Thomasville, Ga.

Gentlemen: Herewith find my check covering enclosed invoice for roses.

The plants came to hand in fine shape and were planted immediately and are now doing fine. They are the best plants I have ever gotten from any one since I came south, and I congratulate you upon your ability to produce plants of this quality.

Wishing you continued success, and with best wishes for a prosperous year, I beg to remain,

Very truly yours,

H. T. B., Florida.

Lone Star Gardens,

Thomasville, Ga.

Gentlemen: Kindly send me your price list and catalogue.

We can do business this season, for the stock that you sent me last year was entirely satisfactory in every way, and I like your promptness of delivery.

Thanking you, I am,

Yours truly,

U. D. T., South Carolina.
